SafetyVEND

On-site Safety is a Priority

Inventory Vending Solutions (IVS) proudly presents SafetyVEND, the solution to your PPE consumable challenges of inventory waste, mis-use, and loss of productivity when it comes to staff accessing essential workplace tools-of-the-trade.

SafetyVEND is a simple way to ensure staff, site visitors and contractors have easy and convenient access to PPE consumables all day, every day, and ensures you maintain complete accountability and inventory control, providing guaranteed business cost savings.

Whatever, Wherever and Whenever

IVS supplies a complete range of SafetyVEND machines that are capable of dispensing a wide range of PPE consumables. We understand that no two sites are the same. We can provide a customised solution to suit every location, which meets our client's unique needs.

The SafetyVEND solution offers the benefit of a system which allows you to dispense a wide range of items ensuring you always obtain the right item.

Our most popular stock items include;

- Safety Glasses, Goggles & Vests
- Mechanics & Riggers Gloves
- Helmets, Boots and Shirts
- Dust Masks
- Disposable Overalls
- Ear Plugs (corded & cordless)
- Torches & Batteries
- Drill Bits
- Grinding & Flap Discs
- Cutting & Fan Wheels
- Electrical & Thread Tape
- Paint Brushes
- First Aid Products

Our standard range of essential tools-of-the-trade items have been selected to best meet the needs of industries including; Mining & Mine Services, Manufacturing, Engineering, Heavy Industrial Manufacture, and varied factory facilities.

The SafetyVEND units can be located in any covered area. Our specialist and dedicated sales team will conduct a thorough site appraisal FREE OF CHARGE to personally assist in best-practice on-site location and placement of vending machines.

Our IVS market leading software provides our clients with a complete inventory control system to ensure 24/7 staff and contractor access to PPE consumables, supported by a complete reporting function.

IVS issues each staff member or contractor with a unique identifier card or fob which is used to gain access to machines. Every transaction is recorded, and can identify when and where the consumable is being used, and by whom.

Our real-time system connects all machines onsite to our web server via your existing LAN or GPRS connection giving you total access and visibility to each unit on-demand. Furthermore, an online log provides your management team access to records allowing immediate reporting on usage, re-fill requirements, as well as identify high-use periods or locations.

Reports can be scheduled as required, and will be tailored to meet your individual accounting or reporting requirements.

Key areas of cost reductions and economic benefits typically include:

- Improved safety onsite.
- Reduction in consumption (over 30%).
- Higher levels of accountability.
- Reduction in inventory levels, improved inventory turn rates.
- Reduction of tool and supply retrieval and waiting time.
- Elimination of stock-outs, related loss of production and emergency orders.
- Elimination of obsolete inventory.
- Reduced procurement costs.
- Accurate, reliable inventory visibility.
- 24/7/365 availability.
- Opportunities for product consolidation.
- Reclaim wasted time and floor space for production.

Why Inventory Vending Solutions Pty Ltd?

The Directors of IVS are Tony Halfhide and Steve Dann. Both are highly respected members of the vending community and have been leading innovation in the industry for over 25 years. As founding members of Australia's largest independent vending organisation, both Directors' experience in vending, business and management is second to none.

As a pioneer of PPE vending, our business has rapidly grown to service all regional and metro locations across Australia, with a team of dedicated customer driven staff members.

The IVS mission is to provide simple, user-friendly, affordable and cost effective inventory systems which provide our clients with on-site accountability, transparency and increased productivity.

To discuss your specific business requirements, and to learn how we can work together to create a tailored solution to your site's individual needs please call us direct on 1300 523 389 or email sales@safetyvend.com.au.

PROUDLY AUSTRALIAN OWNED

Latest Innovations @ IVS

We have recently launched a Chemical Control Unit (CCU) to great success. These new units provide control and visibility over the dispensing of chemical sprays such as:

- Silicone spray
- HHS Grease
- Battery Terminal Spray
- Cavity Protection Spray
- Rapid Start
- Rust Off
- CU800 Cutting Oils

The machines are carefully configured to adhere to Australian Safety Standards. IVS provide a complete Chemical Register and Storage Compatibility Risk Assessment based on the individual unit products. Our unique machine design allows the equipment to breathe in such a way as to remove any fumes should they happen.

The unit integrates with our web based inventory system to provide site management with excellent visibility on what products are being used and when.

All on-demand tools-of-the-trade carry high price points. Your ability to monitor the items and their end use is a great opportunity to instantly take control, and reduce on-site spends.
